

Five Channel 1 > 2 Optical Splitter

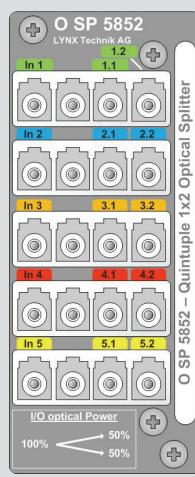

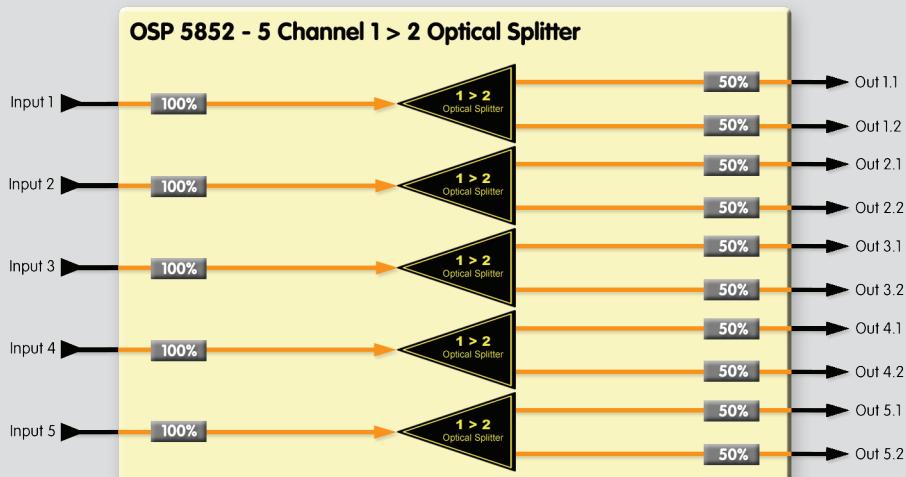

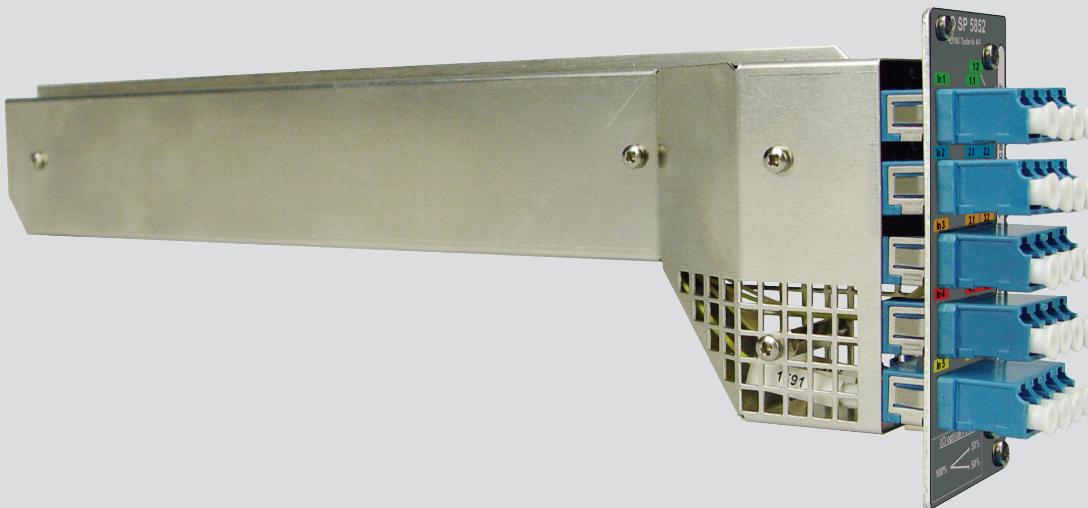

Description

The OSP 5852 provides 5 independent 1>2 optical splitters / combiners in a single module. For each channel the optical input is split into 2 outputs, each one having 50% of the input power.

The module is passive in operation, meaning it requires no power, and is mechanically compatible with all Series 5000 rack frames and installs from the rear of the rack.

Features

- Five precision 1>2 optical splitters in a single module
- Each channel has 50% / 50% split ratio
- LC - PC connections (singlemode)
- Compatible with all Series 5000 rack frames (2RU and 1RU)
- Occupies one card slot
